Paths

GET /usuario/{id} Buscar individualmente

Buscar un usuario por id.

Parameters

| Type | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content / | |

PUT /usuario/{id} Modificar

Buscar un usuario por id y añadirle nuevos campos.

Parameters

| Туре | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |

DELETE /usuario/{id} Borrar

Borrar un usuario de la base de datos por su id.

Parameters

| Туре | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |

GET /recaudacion/{id} Buscar todo

Buscar todas las recaudacions de la base de datos.

Parameters

| Type | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Description | Links |
|-------------|----------|
| OK | No Links |
| Content | |
| C | DK |

PUT /recaudacion/{id} Modificar

Buscar una recaudacion por id y añadirle nuevos campos.

Parameters

| Туре | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |
| | | |

DELETE /recaudacion/{id} Borrar

Borrar una recaudacion de la base ded datos por su id.

Parameters

| Type | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |

GET /maquina/{id} Buscar individualmente

Buscar una maquina por id.

Parameters

| Туре | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |

PUT /maquina/{id} Modificar

Buscar una maquina por id y añadirle nuevos campos.

Parameters

| Туре | Name | Description | Schema |
|------|--------------------|-------------|-----------------|
| path | id required | | integer (int64) |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |
| | | |

DELETE /maquina/{id} Borrar

Borrar una maquina de la base ded datos por su id.

Parameters

| Type | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |

GET /maquina/cliente/{id} Buscar las maquinas de un solo local

Recibe un local y devuelve todas las maquinas que estén en el mismo

Parameters

| Туре | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content / | |

PUT /maquina/cliente/{id} Desvincular entidades

Buscar una maquina por id y la desvincula de su cliente.

Parameters

| Туре | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |

PUT /maquina/almacenada/{id} Almacenar maquina

Buscar una maquina por id y almacenarla.

Parameters

| Туре | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |

GET /factura/{id} Buscar individualmente

Buscar una factura por id.

Parameters

| Type | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |

PUT /factura/{id} Modificar

Buscar una factura por id y añadirle nuevos campos.

Parameters

| Туре | Name | Description | Schema |
|------|-----------------------|-------------|-----------------|
| path | id required | | integer (int64) |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |

DELETE /factura/{id} Borrar

Borrar una factura de la base ded datos por su id.

Parameters

| Туре | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |

GET /cliente/{id} Buscar individualmente

Buscar un cliente por id.

Parameters

| Туре | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |
| | 1 | |

PUT /cliente/{id} Modificar

Buscar un cliente por id y añadirle nuevos campos.

Parameters

| Туре | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |
| | | |

DELETE /cliente/{id} Borrar

Borrar un cliente de la base de datos por su id.

Parameters

| Type | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links | |
|------|-------------|----------|--|
| 200 | OK | No Links | |

GET /usuario Buscar todo

Buscar todos los usuarios de la base de datos.

Responses

| Links |
|----------|
| No Links |
| |
| |

POST /usuario Crear

Crear un usuario e introducirlo en la base de datos.

Responses

| Code | Description | Links |

| 200 | OK | No Links |
| | Content | |
| | | |

GET /recaudacion Buscar individualmente

Buscar una recaudacion por id.

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content / | |

POST /recaudacion Crear

Crear una recaudacion e introducirla en la base de datos.

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |

GET /maquina Buscar todo

Buscar todas las maquinas de la base de datos.

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content / | |

POST /maquina Crear

Crear una maquina e introducirla en la base de datos.

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |
| | 1 | |

GET /factura Buscar todo

Buscar todas las facturas de la base de datos.

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content / | |

POST / factura Crear

Crear una factura e introducirla en la base de datos.

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |

GET /cliente Buscar todo

Buscar todos los clientes de la base de datos.

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content / | |

POST /cliente Crear

Crear un cliente e introducirlo en la base de datos.

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |
| | 1 | |

GET /usuario/{id}/maquina Buscar maquinas

Buscar todas las maquinas relacionadas con el usuario especificado.

Parameters

| Type | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |
| | 1 | |

GET /tiene/usuario/{idUsuario} Buscar por usuario

Buscar todas las relaciones del usuario especificado que haya de la base de datos.

Parameters

| Туре | Name | Description | Schema |
|------|-----------|-------------|-----------------|
| path | idUsuario | | integer (int64) |
| | required | | |

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content / | |

GET /tiene/maquina/{idMaquina} Buscar por maquna

Buscar todas las relaciones de la maquina especificada que haya de la base de datos.

Parameters

| Type | Name | Description | Schema |
|------|---------------------------|-------------|-----------------|
| path | idMaquina required | | integer (int64) |

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |

GET /maquina/{id}/recaudacion Buscar reacaudaciones por maquina

Buscar todas las recaudaciones de una máquina.

Parameters

| Туре | Name | Description | Schema |
|------|----------|-------------|-----------------|
| path | id | | integer (int64) |
| | required | | |

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |
| | | |

GET /maquina/data/ingresos Buscar por ingresos

Buscar todas las maquinas de la base de datos con sus ingresos históricos correspondientes agrupadas por el nombre de la maquina.

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | ОК | No Links |
| | Content / | |

GET /logs/info

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |

GET /logs/error

Responses

| Code | Description | Links |
|------|-------------|----------|

| | Content | |
| | 1 | |

GET /logs/debug

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content / | |

GET /cliente/locales Sacar clientes con sus ides

Buscar todos los clientes de la base de datos con id y nombre del local para settearselos a una maquina desde el front.

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |

GET /cliente/data/ingresos Buscar por ingresos

Buscar todos los clientes de la base de datos con sus ingresos históricos correspondientes.

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |
| | 1 | |

GET /cliente/clientes Buscar todo

Buscar todos los clientes de la base de datos.

Responses

| Code | Description | Links |
|------|-------------|----------|
| 200 | OK | No Links |
| | Content | |
| | 1 | |

DELETE /tiene/{idUsuario}/{idMaquina} Borrar

Borrar una relacion de la base de datos por el id de sus integrantes.

Parameters

| Туре | Name | Description | Schema |
|------|------------------------------|-------------|-----------------|
| path | idMaquina required | | integer (int64) |

| Туре | Name | Description | Schema |
|------|------------------------------|-------------|-----------------|
| path | idUsuario required | | integer (int64) |

Responses
